Vishnu vardhan guptha Javvaji

Aspiring Software Developer | Python · Flask · Django · React | Backend & Full-Stack | 8.84 CGPA | Final Year CSE @ Malla Reddy Engineering College

Greater Hyderabad Area

Summary

I'm a final-year B.Tech Computer Science student at Malla Reddy Engineering College (CGPA: 8.84), passionate about building practical software that solves real problems.My hands-on experience spans backend development with Python, Flask, and Django, and I'm currently expanding into React for full-stack development. I've built two end-to-end projects — a Flask-based e-commerce platform with secure APIs and real-time transactions, and a Django-powered automated resume analyzer using NLP for intelligent skill matching.During my internship at Infosys Springboard, I worked as a Python Web Developer and also took on the Scrum Master role — leading agile ceremonies, facilitating code reviews, and keeping the team aligned on sprint goals.What sets me apart: I combine strong technical foundations with team leadership experience, making me someone who can write good code and help a team ship it well. Tech: Python · Flask · Django · React · MySQL · SQLite · NumPy · Pandas · Docker · Git Currently: Actively seeking full-time roles in Software Development / Backend Engineering Open to: Full-time opportunities, referrals, and collaborations

Experience

Vijay Software Solutions

Python Full Stack Developer

February 2026 - March 2026 (2 months)

Hyderabad

Built a production-ready e-commerce platform as part of a 2-month internship, handling both backend and frontend development end-to-end.

• Developed REST APIs using Django REST Framework for product management, user authentication, cart, and order workflows.
• Built a responsive React frontend integrated with Django APIs for a seamless shopping experience.

• Designed and managed PostgreSQL database schemas with proper relationships and indexing for performance.
• Wrote clean, modular code following best practices and participated in regular code reviews with the team.

Tech Stack: Python · Django REST Framework · React · PostgreSQL · Git

Infosys Springboard

Python Web Developer (Intern) · Infosys Springboard
February 2025 - April 2025 (3 months)
Hyderabad

• Built a fully functional e-commerce web application using Flask, featuring a user-facing storefront and an admin panel for product, inventory, and analytics management.
• Developed clean, scalable RESTful backend APIs in Python with SQLite database integration, enabling real-time transaction handling.
• Served as Scrum Master for the development team — facilitated daily standups, sprint planning, and retrospectives to keep the team aligned and on schedule.
• Conducted structured code reviews to maintain code quality, enforce best practices, and reduce technical debt across the codebase.

Tech Stack: Python · Flask · SQLite · HTML · CSS · JavaScript · Git
